Workshop on Industrial Experimentation

**Under TEQIP-II, NIT Raipur
and ISI, Kolkata**

4th - 5th September 2015

Organized by

**Department of Metallurgical Engineering,
NIT Raipur in association with
ISI, Kolkata**

**National Institute of Technology
Raipur-492 010 (Chhattisgarh)**

Department of Metallurgical Engineering NIT Raipur

About Raipur

Raipur is the capital city of Chhattisgarh, known for its fast growing industries, business and educational hub of the nation. It is well connected by air and railways with the major cities. Energy Park, Gandhi Udyan, Purkhouti Mukhtangan, Burha Sarowar, Guru Ghasidas Museum, Nandanwan Zoo, Mahamaya Temple *etc.* are some of the interesting places to visit in Raipur.

NIT Raipur

The NIT Raipur started its journey as Govt. Engineering College, Raipur in the year 1956 achieved the NIT status, an Institute of National Importation, in the year of 2005. The Institute offers graduate and undergraduate programs in various engineering discipline.

Metallurgical Engineering Department

The Department of Metallurgical Engineering is one of the premier branches of the Institute serving to cater the need of trained manpower to the metallurgical industries located in and around the central India since the time of its inception.

How to reach

The institute is 7 km from Raipur railway station and about 20 km from airport and is situated at GE road. Raipur city is well connected to major cities by air, train as well as by road.

Background about the workshop

Problems of industrial and technological research require a vast amount of experimentation. The scientific way of planning experiments and analyzing the resulting data using statistical principles is of paramount interest among the working engineers. Engineering students, who often have to conduct experiments as a part of their curriculum, get a preliminary course in statistics but lack in understanding the statistical concepts, principles and methodologies of experimentation. The proposed program would attempt to expose these young would-be engineers to the concepts of Statistical Design and Analysis of Experiments as well as the link between such concepts and real life engineering / scientific activities through classroom experiments.

Key Speakers

- Dr. Prasun Das, ISI, Kolkata
- Dr. Sugata Adhikari, ISI, Kolkata

Who can attend

Final year UG/PG students, Research Scholars and Faculty Members. Preferably background with Mechanical, Electrical, Chemical and Metallurgical Engineering.
